

**Amendments to the Specification:**

Please amend the specification as follows:

On page 12, please replace the paragraph that starts on line 23 with the word “An” and ends on line 24 with the word “bulge.” with the following amended paragraph:

As shown in Fig. 1, the separation wall 117 between the auxiliary chamber and the main chamber preferably comprises a raised area 115, like a bulge.

On page 13, please replace the paragraph that starts on line 23 with the word “The” and ends on line 26 with the word “202.” with the following amended paragraph:

The applicator piston 210 comprises a separation wall 215 that separates the auxiliary chamber 211 in the applicator piston 210 from the main chamber 202. As shown in Fig. 3, the separation wall comprises a central through-hole that is covered by a membrane 212 at the side facing the mixing chamber 202.
